Annex 1. Regression model used for the estimation of the incidence of symbolic universes in 2009

a) *ordered universe* [$F_{(5,6)}=18,478$, $p=0,01$; $R^2=0,888$];
b) *interpersonal bond* [$F_{(2,5)}=13,346$, $p=0,01$; $R^2=0,779$];
c) *caring society* [$F_{(2,12)}=9,024$, $p=0,004$; $R^2=0,534$].

Ordered universe

(Costant)	-25,565
SOC_ECON5- General Employment rate (15 -64 years)	0,439
SOC_ECON9- Unemployment rate. 25 y.o. and over	1,379
HEALTH_SECUR7b- Death due to malignant neoplasm of colon, recto sigmoid junction, rectum, anus and anal canal	0,956
HEALTH_SECUR7d- Death due to malignant melanoma of skin	5,125
PRODUCT6- Technology: Internet use for interacting with public authorities	-0,771

Interpersonal bond

(Costant)	16,397
PRODUCT5- Technology: Internet users	0,281
HEALTH_SECUR8a- Death due to cerebrovascular diseases	-0,118

Caring society

(Constant)	28,461
SOC_ECON8- Percentage of unemployed. Young people (<25 y.o.)	-0,417
HEALTH_SECUR7d - Death due to malignant melanoma of skin	-2,321
